Re: NPDES Permit for Additional Acre at Terminal 106

Dear Bill:

Pursuant to my conversations with Ms. Anne Phar, Environmental Consultant to the Port of Seattle, it is Stoneway's intent that any and all storm water runoff from the additional one acre parcel Stoneway proposes to lease from the Port will be subject to the terms and conditions of the NPDES Permit currently held by Ash Grove Cement Company.

If you have any questions concerning this matter, please do not hesitate to call. Meanwhile, I look forward to receiving the Port's proposed final draft of the lease for the site in advance of Stoneway's occupancy of the Property.

Very truly yours,
STONWAY CONCRETE COMPANY

ADVISED WE HAVE NO
NPDES PERMIT - R 3/18
